

PRESSAIRE

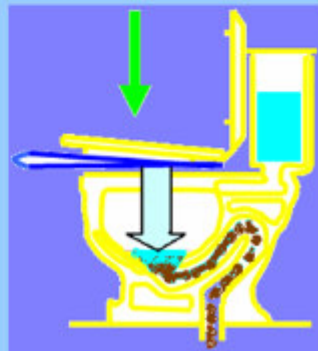

CLEAR CLOGGED TOILETS

!!WITHOUT A MESSY PLUNGER!!

FOLDS AND STORES OUT OF SIGHT

THE CLEAN, QUICK, EASY, SIMPLE
WAY TO CLEAR A CLOGGED TOILET
WITH NO MESS!

Pressaire is constructed of strong yet flexible vinyl and two spring-steel hoops. This unique design allows Pressaire to be conveniently folded to permit storage in a drawer, under the sink, or behind the toilet and out of view from your guests. When needed, simply unfold and Pressaire becomes a high volume bellows. Compressing Pressaire expels the water and clog from the toilet. When finished simply fold and return Pressaire to its storage location. Pressaire also helps with the following:

- Make your toilet bowl cleaning chore more efficient. A quick flush with Pressaire removes most of the water in your toilet bowl, thus increasing the concentration of your toilet cleaner in the bowl, making it more effective.
- A slow flushing toilet may be due to mineral buildup deep in the interior of the toilet. After a quick flush with Pressaire add more than the normal amount of toilet cleaner you typically use. This exposes more of the interior of the toilet to the now more concentrated cleaner. This can help dissolve the mineral buildup in the toilet interior and improve the toilet flush.
- An encounter with a clogged toilet can be a nightmare while on travel. Pressaire can be packed in the glove-box of your car, a suitcase, travel bag or even a purse to ease your travel worries.
- If you often have to flush twice to clear the toilet bowl, Pressaire can eliminate that second flush. Just use Pressaire to flush the water from the toilet bowl before a normal flush. This also helps to conserve water.
- For those who have a cabin or home where freezing is common, Pressaire can make winterizing your toilets much easier by removing most of the water with a simple flush instead of using cups, buckets, or sponges.
