

Last Squirt™ DISPENSER TUBE EXTENDER

STOP DILUTING • STOP SCOOPING • STOP WASTING

Have you ever been frustrated by not getting the remaining soap, body wash, or other products out of the bottle? Designed to save the consumer time and money without changing the original bottle design, Last Squirt's patented design attaches to the existing tube in pump and spray bottles to get the remaining product out. It's easy to use and reduces waste.

Up to 21% of product is left in the bottle after the pump stops working according to Consumer Reports. Diluting decreases effectiveness. Scooping or turning the bottle upside down creates a mess and changes the intended design of the bottle. Only Last Squirt get the remaining product easily and neatly.

FEATURES

- Patented Design
- Hypoallergenic
- Reusable
- Made in the USA
- Does not change existing bottle design

MSRP

\$ 6.99

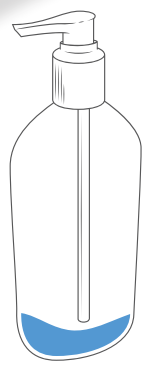

BENEFITS

- Saves Money and Time
